## 10 Reasons to Choose Unilock

There's more to a successful project than what you see on the finished surface.

## STYLES YOU CAN'T GET ANYWHERE ELSE

From the sleek, contemporary look of Umbriano® to the timeless feel of weathered European cobblestones and everything in between, Unilock® has something for everyone's landscape dreams.

### 2 LINIL OCK IDEA CENTER

The Unilock Outdoor Idea Center is a real place where you can walk through inspiring displays of Unilock products in a full-scale outdoor setting. Let our friendly customer service staff show you our amazing products and help you create your dream plan.

We'll even provide you with **free product samples.** 

#### We're here to help you every step of the way.

**Rittman Location** 12560 Sheets Road Rittman, OH 44270

**Cincinnati Location** 8600 Southwest Parkway Harrison, OH 45030

## 3 ADVANCED TECHNOLOGY

With products to suit every budget and a huge variety of material types, Unilock will make your landscape dreams come true!

- > EasyClean™ Stain Resistance
  Factory sealed to provide integral surface
  protection from stains
- > Reala™ Technology Cast from natural stone, brick and historic European cobblestones
- > Ultima™ Concrete Technology Up to 4x stronger than poured-in-place concrete
- > ColorFusion™ Technology

  Randomly dispersed color and granite particles

## GREENER CHOICES - WATER MANAGEMENT

We began selling permeable pavers more than 25 years ago and have more experience in this area than any other manufacturer. Permeable pavers are a popular choice to unlock useable space in municipalities where non-permeable lot coverage is restricted. They allow water to flow through extra wide joints to replenish the natural eco-system.

This icon indicates permeable products.

## 5 UNSURPASSED DURABILITY

There isn't a better paving product in the world. Unilock products set the standard for quality in the industry.

#### Every Unilock product is...

- > Durable
- > Made with colorfast pigments
- > Slip resistant
- > Resistant to salt erosion
- > Designed to tolerate oil and gas spills
- > Backed by our Transferable Lifetime Guarantee

## MORE EXPERIENCE THAN ANYONE ELSE

Founded in 1972, Unilock was the first to manufacture paving stones in North America. Over the past 47 years, we have perfected our manufacturing process and have developed technologies to create products that set the bar for innovation and creativity.

Our world-class production facilities are renowned for their safety and cleanliness and are staffed with the most experienced production people in the industry.

This, in combination with our ongoing investment in technologically advanced equipment, ensures we're able to provide the best in quality, consistency and design.

## UNBEATABLE PRODUCT GUARANTEE

Unilock was the first to offer a transferable Lifetime Guarantee on our manufactured products. That's quite the commitment since we have almost 2 billion stones on the ground! You can sleep well at night knowing that Unilock is behind you 100%.

## GUARANTEED TO DO THE JOB RIGHT

A product is only as good as the workmanship used to install it. Unilock Authorized Contractors are rigorously screened and hand-picked for their quality workmanship and exceptional business practices which enables us to guarantee their workmanship for a period of two years. When you choose a Unilock Authorized Contractor, you can be assured that you are getting the best in the business.

## WE'RE HERE TO HELP

Unilock is a family owned company that cares about the success of your project. Contractors know that help from Unilock is only a phone call away and we're committed to providing the best customer experience in the industry.

## THE GO-TO PRODUCT FOR PROFESSIONALS

There's good reason why the pros choose Unilock products. From architects and landscape architects to city engineers and commercial property owners, Unilock is preferred by professionals.

Many of the products featured in this catalog have been installed in large scale commercial projects in some of the most prestigious spaces in North America. If we're the choice of the pros, shouldn't you choose us, too?

If you can dream it, we can make it happen!

Whether you're dreaming of an intimate patio, a practical driveway or a luxurious outdoor living space, Unilock has everything you need to make your dream come true.

## Unlock the Possibilities!

## Outdoor Living

Imagine extending your living space outdoors. An elegant and beautiful backyard not only adds tremendous value to your home, it also adds wonderful opportunities for your family to enjoy time together.

With outdoor spaces designed for alfresco living, you'll gain a new appreciation for outdoor dining, relaxing, enjoying conversation in a peaceful environment and entertaining friends and family in style.

#### **BOTTOM RIGHT**

Pavers: Bristol Valley\* (Steel Mountain) with Copthorne\* (Basalt) and Brussels Block\* (Sandstone) accent Wall: Brussels Dimensional System\* (Sierra) with Copthorne (Basalt) accent and Ledgestone\* (Buff) coping

#### **EXPAND YOUR HOME**

A new outdoor living space can add functional square footage to your existing home by providing a new space to relax and entertain. Consider first how you would like to use the space, and then design it as an extension of your interior decorating style. Even a small space can appear bigger by using different paver colors, paver borders, elevation changes and seat walls to define distinct areas for cooking, eating and relaxing.

Pavers: Bristol Valley\* (Bavarain Blend) with Copthorne\* (Basalt) accent and walkway

Wall: Rivercrest\* Wall (Buff) with Copthorne with Natural Stone coping and pillar caps

Pavers: Beacon Hill" Smooth (Bavarian) with Town Hall" (Basalt) accent
Wall: U-Cara\* Sierra (Pitched)

#### Did You Know?

Unilock offers a software program that creates 3D visuals of your design. The software is called Uvision\* 3D Landscape Creator and it's available to your contractor or designer.

#### **GET INSPIRED!**

Fire features are growing in popularity because they add visual interest and warmth that makes the space more enjoyable to use in cooler weather. Lighting installed in gardens, low walls, steps and pillars will also help draw people outside in the evening and adds visual appeal that you can enjoy from inside your home. Snow-covered pillars and walls can make beautiful accents to your property in the winter months.

## JNILOCK\* AWARDS OF EXCELLENCE BEST IN SHOW

This 1,200 square foot backyard makeover stemmed from an existing relationship. Bruss worked with the family several years prior on their front landscaping.

## **Congratulations! Bruss Landscaping Inc.**

WINNER OF THE 2019 UNILOCK AWARDS OF EXCELLENCE BEST IN SHOW.

Pavers: Umbriano® (Winter Marvel) with Town Hall® (Basalt) accent Wall: Rivercrest® Wall (Coastal Slate) with Copthorne® (Basalt) accent and Ledgestone™ (Grey) coping and pillar caps

The family already had a backyard that was a Unilock patio, with a firepit they used often, but they felt the existing space no longer fit the style and scale of the house and their growing family's needs. In addition to reworking the firepit, they also wanted a pool for their young daughters and an outdoor kitchen for entertaining.

The site presented a few design challenges. As a relatively flat site, drainage was a major consideration that required planning to balance the needs of meeting code for step heights while keeping the proper drainage away from the house and pool.

## The family was delighted with the outcome. The whole reason we do these projects is because we want people to use them.

A flat site can lack dramatic elevation, so the team explored opportunities to make the space visually interesting. With so many elements, it was a challenge to balance everything and still create the "wow" factor.

Umbriano was selected for the patio/pool deck because of its refined surface and long-lasting color, and Rivercrest Wall for the pillars, firepit and grill island, to add vertical visual interest and natural textures. Town Hall and Copthorne, both in Basalt, were used for accents, to add depth to the color scheme.

The family was delighted with the outcome. "It was straight happiness," says Bruss Landscaping. "The whole reason we do these projects is we want people to use them. They have used the pool every single day since it was opened. I see posts on social media and that's the best, seeing them sharing it with friends, their children – that means we've done our job."

### Pool Decks

The beauty of a built-in swimming pool is trumped by the excitement of having it right in your own backyard! Here your imagination can run wild, with the addition of complementary pavers, slabs, borders, and vertical features to enhance and distinguish.

Pavers: Bristol Valley\* (Steel Mountain) with Copthorne\* (Basalt) and Brussels Block\* (Sandstone) accents and Brussels Fullnose Coping (Sierra)

Walls: Brussels Dimensional System\* (Sierra) with Brussels Fullose (Sierra) pool coping and Brussels Fullnose (Sandstone) coping and step treads

#### **SIZE MATTERS**

When planning your pool deck, four feet is the minimum perimeter around the pool for basic access. However, if you intend to use the pool deck as a patio for entertaining or sunbathing, you'll need to increase this significantly. Be sure to keep in mind the size of your outdoor furniture; it's typically much bigger than indoor furniture!

#### LEFT PAGE

Upper Pavers: Artline™ (Granite Fusion) and with Mattoni™ (Dark Charcoal) and Brussels Block® (Sandstone) accents Lower Pavers: Westport™ (Granite) with Mattoni (Dark Charcoal) and Brussels Block (Sandstone) accents Walls and Pillars: Brussels Dimensional System™ (Sandstone) with Ledgestone™ (Buff) coping and pillar caps Grill Island and Firepit: Lineo™ Dimensional Stone (Granite)

#### **TOP RIGHT**

Paver: Beacon Hill™ Smooth XL (Granite Fusion)

#### **BOTTOM RIGHT**

Water Feature: U-Cara\* Steel Mountain (Pitched) with U-Cara Midnight Sky (Umbriano) accent and Natural Stone (Stone Cliff Grey) coping

Naturally, the deck surrounding a pool not only enhances its elegance, it's also important for safety reasons.

#### **SAFETY CONSIDERATIONS**

The paver you choose for your pool deck deserves special consideration because you'll be walking on it in your bare feet! Be sure to choose a color that won't absorb too much heat from the summer sun. A smoother surface is pleasing to walk on, but make sure it's sufficiently non-slip. Umbriano® is our most popular choice for pool decks. For the coping around the edge of the pool, avoid products with abrasive edges. A contrasting coping color or inset border is also something to consider, as it helps define the pool edge.

#### LEFT

## **Driveways**

There's nothing like the welcome you'll feel when you pull up to your Unilock driveway. A stunning paver driveway is an investment that adds instant curb appeal and value to your home. Your Unilock driveway will be strong, durable and designed to withstand heavy use throughout the year while looking beautiful for years to come!

#### THINK GREEN 🍪

Permeable pavers allow rainwater to flow between the joints, through base materials and into the subsoil below. This reduces puddling on the driveway surface when it rains, and reduces ice build-up in winter. It also provides a dual "green" benefit; not only does it reduce the amount of water that flows into storm sewers but it also provides moisture to surrounding plant material.

## Entrances & Walkways

A great looking front entrance gives guests a warm welcome.
Attractive steps that are wide enough to easily navigate, low garden walls and planter boxes, and smartly placed lighting all contribute to a cozy feeling that smooths the transition from the street to your home.

Pavers: Umbriano\* (Summer Wheat) with Town Hall\* (Burnt Clay) accent Steps: Natural Stone (Indian Coast)

Paver: Copthorne® (3 Color Blend) accent

#### Did You Know?

Unilock offers homeowners and contractors free samples so you can match our products to your home.

#### **A PLACE TO SIT**

Even a modest front yard can usually accommodate a small seating space. Picture yourself enjoying your morning coffee or watching the kids playing as you proudly admire your beautiful Unilock entry.

**Pavers:** Richcliff\* (Dawn Mist and Pebble Taupe) with Copthorne (3 Color Blend) accent

 $\textbf{Pavers:} \ \ Beacon \ Hill ``Smooth (Granite Fusion) with Copthorne (Basalt) accents \\ \textbf{Steps:} \ \ Copthorne (Basalt) accent fascia with Ledgestone ``(Buff) step treads$ 

#### **COMPLEMENT YOUR HOME**

The exterior of your home should set the stage for the design, textures and colors you choose. Consider replicating, augmenting or complementing the architectural features of your home.

#### LEFT PAGE

Making your Project Unique

# Products

Unilock makes your landscape dreams come true with the highest quality products in the industry.

# Unilock Product Categories

Unilock makes your landscape dreams come true with the highest quality pavers and walls in the industry. We offer five categories of products that are designed to offer you beauty, longevity and low maintenance. Whatever Unilock product you choose, we stand behind it 100%.

#### **CLASSIC**

Our budget-friendly, Unilock Classic pavers and walls are manufactured to exceed ASTM standards for quality and strength. Available in classic shapes and styles, these products utilize a traditional product mix of large and small aggregates that is consistent from top to bottom with color mixed throughout.

#### ENDURACOLOR"

The refined surface of Unilock EnduraColor products is achieved with a two-step manufacturing process that combines a base of coarser aggregates for a stronger foundation with concentrated color and wear-resistant finer aggregates on top. This process protects the surface from the appearance of fading over time because the top layer prevents large, lighter color aggregates from ever showing through. Now, with U-Cara\*, walls are available with EnduraColor too!

# 

Deep, rich colors and a multitude of unique Reala<sup>TM</sup> textures combine to deliver the timeless beauty of Unilock Elegance. From the timeworn look of European cobblestones, to the classic luxury of riven natural stone slabs, our Elegance collection offers styles you can't get anywhere else. Thanks to Ultima<sup>TM</sup> Concrete, the look you purchase is the look that will last, with up to 4x the strength of poured-in-place concrete.

#### Did You Know?

Unilock was the first company to bring EnduraColor technology to North America, more than 20 years ago.

#### **PERMEABLE**

To reduce the amount of rainwater that flows off the surface of your new pavers and into storm sewers, consider a permeable paving system. Unilock permeable pavers have extra wide joint spaces and are installed on a special aggregate base so water flows through, replenishing the natural ecosystem.

# The Product is Roughly 20% of the Total Cost

**BUY THE BEST!** 

The major cost of your project is the prep work and installation – not the cost of the product (the ratio is approximately 20% product 80% installation). Don't compromise! Choose the product you love, to get the maximum enjoyment from the investment you've made below the surface

ELEGANCE | RICHCLIFF

# **Richcliff**\*

Inspired by the texture of natural cut flagstone, Richcliff offers superior durability and timeless appeal ideal for driveways, patios, walkways and commercial projects. A multitude of stone textures were cast using Reala™ Technology, to ensure that finished projects will have a completely random and natural appearance. And unlike natural stone, which can crack, split and fade, Richcliff is virtually indestructible.

Dawn Mist

Deep rich colors and unique textures

# **Richeliff**\*

NOT RECOMMENDED FOR DRIVEWAYS

## Courtstone<sup>®</sup>

The polished look of Courtstone brings a luxurious, old-world elegance to driveways and walkways, with Ultima™ Concrete Technology providing up to four times the strength of conventional poured concrete. Using Reala™ Technology, the unique shapes of Courtstone were cast from real European cobblestones, but manufactured with a consistent base for efficient installation and superior interlock. It's a look that has remained popular for centuries.

# Town Hall @

The substantial proportions and unique color blending of Town Hall are modeled after historic North American clay street pavers. The timeless look makes it an excellent choice for driveways, patios, walkways and more, in either traditional or permeable applications. The rich colors and classic shape also make it popular for borders, banding and other accents. To ensure projects have a random appearance, Town Hall textures were cast from a multitude of different surfaces using Reala<sup>™</sup> Technology. The result is vintage, streetscape charm that stands the test of time.

# Copthorne<sup>®</sup>

Inspired by the rich color and timeworn beauty of European street pavers, Copthorne offers more delicate dimensions than Town Hall\*. These proportions make it possible to design curved walkways and borders using Copthorne without the need for cutting. Cast using Reala™ Technology for an authentic surface appearance, and Ultima™ Concrete Technology to deliver up to four times the strength of conventional poured concrete, Copthorne offers timeless beauty.

### **LAYING PATTERNS**

One of the factors that makes your landscape project unique, is the laying pattern you choose. Your contractor can recommend choices that will utilize the best laying pattern for the product you've selected.

Visit Unilock.com for laying patterns.

#### **JOINTING SAND COLOR CHOICE**

Jointing sand color is another way to enhance your landscape dreams, offering a remarkable visual effect by creating stunning contrasts that can visually tie a hardscape together.

**BLACK SAND** 

**TAN SAND** 

**GREY SAND** 

### Firepits & Fire Features

Imagine the pure joy of sitting around an outdoor firepit with your friends and family! Envision getting cozy on a cool night and enjoying the mesmerizing flames from your backyard Unilock firepit or fireplace. It's a dreamer's dream come true!

Unilock products can be used to build a custom fire feature that's perfect for your project.

**Top:** Rivercrest\* (Bella) Fireplace with Series and Universal Coping **Bottom:** Lineo™ Dimensional Stone with Ledgestone™ coping **Lelf:** U-Cara\* (Pitched) with Universal Coping

### **Rivercrest Firepit Kit**

**REMEMBER** To ensure a long lasting fire feature, direct exposure to extreme heat from an open flame should be avoided. Always construct fire features with a protective heat barrier such as a metal insert, refractory blocks or approved firebrick to prevent potential heat damage.

#### FIREPIT GRILL

Rivercrest firepit kits comes with a firepit grill that fits securely into the firepit.

### **Sunset Firepit Kit**

### **Pre-built Elements**

SPECIAL ORDER

**BELLA FIREPLACE** 

Rivercrest® Wall and Series accents.

### **TUSCANY**Brussels Dimensional Stone° and Copthorne°accents.

### **Outdoor Kitchens**

The evolution of the backyard BBQ is a Unilock specialty. We have a fabulous selection of products to help build custom grill islands and outdoor kitchens that fit your space perfectly and will make you the culinary star of the neighborhood!

### **Pre-built Element**

**BELLA GRILL ISLAND**Rivercrest® Wall and
Universal Coping.

### U-Cara<sup>®</sup> Modular System

The U-Cara Modular System offers a variety of stainless steel frames that can be mixed and matched to construct vertical features like grill islands. Speak to your contractor to select a design and a U-Cara fascia panel finish to suit your project.

With the U-Cara Modular System you can build Grill Islands, Bars, Back splashes, Fire Tables and Pillars.

**LOOKING FOR MORE INFORMATION?**Visit Unilock.com to download the U-Cara Modular System Brochure.

### **Pillars & Water Features**

### **Pillars**

Pillars add a sense of permanence and strength to your landscape dreams, creating visual interest with height variation and functionality. Pillars are great for creating a visual anchor to walls and a place for extra lighting. By adding pillars, you can let your imagination run wild!

## **Looking for Something Different?**Speak to your contractor about using Unilock products to build a custom feature that's just right for your project.

### **Water Features**

From fountains and ponds to waterfalls and custom water features, these soothing additions are a popular way to enhance your landscape. Unilock products can be used to build an endless variety of water features, perfect for your landscape dream.

### **U-Cara Wall Mount System**

The U-Cara Wall Mount System allows you to put the finishing touches on your project by cladding existing structures like unsightly exposed foundation areas or concrete steps with U-Cara fascia panels.

LOOKING FOR MORE INFORMATION? Visit Unilock.com to download the U-Cara Wall Mount Brochure.

### Learn About Unilock Superior Products

### Exclusive Unilock Technologies

All products are not created equal. Many products look great when they're first installed, but after time the difference shows. For over 47 years, the very best designers and contractors have relied on Unilock to supply cutting edge paver and wall products that enable them to build extraordinary projects that stand the test of time.

### Ultima™

Only Unilock has the technology in North America to manufacture Ultima Concrete resulting in pavers up to four times the stronger than poured concrete. With Ultima, the look you purchase is the look that will last.

#### PRODUCTS WITH ULTIMA:

COPTHORNE°, COURTSTONE°, RICHCLIFF° AND TOWN HALL°

### **Reala**<sup>™</sup>

Utilizing REALA technology, a multitude of natural stone surfaces, brick and historic cobblestones are cast to create a wide variety of authentic textures with consistent dimensions that are more cost efficient to install.

#### PRODUCTS WITH REALA:

COPTHORNE®, COURTSTONE®, RICHCLIFF®,
TOWN HALL®, RIVERCREST® WALL, LEDGESTONE™
AND RIVENSTONE™

Learn more about
Unilock Technologies
at Unilock.com.

### Exclusive Unilock Technologies

Unilock is the only company in North America with memberships in Eurobeton and Stein + Design, two prestigious European concrete product innovation groups, which give us exclusive access to leading edge product designs and manufacturing processes.

### **ColorFusion**<sup>™</sup>

The look of natural granite is achieved when color and granite particles are randomly dispersed using proprietary ColorFusion technology to achieve a unique mottled surface.

#### PRODUCTS WITH COLORFUSION:

UMBRIANO® AND U-CARA®

With EasyClean, the occasional spill doesn't have to leave a lasting mark on your new pavement. Unlike costly after-market sealers which merely coat the top, EasyClean goes beyond the surface and becomes integral to the product during manufacturing, making spills and other debris easier to clean before a stain can develop.

#### PRODUCTS WITH EASYCLEAN:

ARCANA™, BRISTOL VALLEY®, GRANITO™ AND UMBRIANO®

### Nothing protects pavers from stains like EasyClean.

- ✓ Pavers are pre-sealed at the factory
- ✓ Enhanced resistance to weathering
- ✓ Reduced dirt absorption
- ✓ Stains from leaves, coffee, ketchup, mustard, wine and BBQ oils are easier to remove

STEP 2 | ABOUT THE PROCESS

# STEP

### Learn About The Process

Now that you've been inspired by our many different products and ideas, it's time to get down to the nitty gritty. We want you to have all of the information you need to make your project a huge success.

**3D Rendering** Created with Uvision® 3D Design Software

The construction process on the following pages will guide you through the various steps of a landscape project. As always – the helpful people at Unilock are always here to answer your questions and provide solutions.

# Construction Process

#### **STEP 1 | EXCAVATION**

The first step in any project is excavation of grass and topsoil. The depth will depend on two factors:

- **1.** Soil Type Clay soil requires deeper excavation; sandy soil requires less.
- 2. Use Heavy loads like driveways and retaining walls require deeper excavation; lighter loads like patios and walkways require less.

Depth of excavation can be reduced by adding DriveGrid  $^{\text{\tiny{M}}}$  once the soil has been removed.

#### **STEP 2 | GRAVEL BASE**

The excavated area will be filled with a gravel base. This gravel base needs to be:

- > **Strong enough** to handle the load of whatever is placed on the surface.
- > **Free draining** so that water drains out of the base into the subsoil. Retaining walls may require a perforated drain pipe in the gravel base to direct water away from the base of the wall.
- > **Extended** at least six inches beyond the edges of the finished paver surface.
- > **Compacted** in several layers, using the proper equipment.

Pavers Bedding Layer

> Gravel Base

DriveGrid Subsoil

#### **STEP 3** | **BEDDING LAYER**

A 1" (25mm) layer of sand or tiny stone chips is spread out and smoothed on top of the solid gravel base.

This layer allows paver or wall units to be leveled or sloped for smoothness and drainage.

Some contractors may recommend a poured concrete surface instead of a typical bedding layer, which is fine as long as the concrete is accurately poured and sits on a stable and well-drained base. Note: Once concrete is poured, the height of paver or wall units can no longer be adjusted.

#### **PAVER CONSTRUCTION**

**Edge Restraint** 

#### **WALL CONSTRUCTION**

#### STEP 6 | SEALING

Unilock pavers will be durable with, or without, a sealer. Some homeowners choose to apply a sealer to enhance the color of the pavers, while others choose to appreciate the color of the pavers as they are. Some Unilock pavers are sold factory sealed. If you choose to seal, you should plan to re-seal every 3-5 years.

REMEMBER A quality project relies on a quality foundation. We recommend hiring a professional contractor.

#### Need help finding a qualified contractor?

Call us at 1-800-UNILOCK or register online at Unilock.com and we'll match you with a Unilock Authorized Contractor in your area.

#### **STEP 4 | RESTRAINT SYSTEM**

For pavers, an edge restraint will be secured with long metal spikes or a concrete edge will be installed to prevent perimeter pavers from drifting out. For walls, glue may be used to secure rows of blocks. Larger retaining walls may require geogrid every few layers to secure the wall into the soil that is being retained.

#### **STEP 5 | JOINT MATERIAL**

The color you choose for joint material impacts the overall aesthetic. It also plays an important role between pavers by keeping out weeds and other debris. Your contractor can help you decide which joint material is right for your project.

There are two types of joint material to choose from:

**Basic Jointing Sand –** Years ago, this was the only joint material available. As it wears away, issues with weeds could arise. If you choose a basic sand, we recommend that you use a joint stabilizing sealer and be prepared to replenish the sand when needed.

**Polymeric Sand –** This special sand stays in place longer because it is combined with a binding agent. However, it's not right for every project and needs to be installed with care to prevent hazing.

**TAN SAND** 

**GREY SAND** 

STEP

# Find a Contractor

Choosing the right contractor for your project is the most important decision of all because even the best materials can be spoiled by poor installation and workmanship. Be sure to ask the right questions and keep in mind that the cheapest quote is rarely the best option.

Our Referral Program will match you with a highly competent contractor who meets the rigid standards we impose to ensure the best quality work and results. Simply contact us online, by phone or at one of our locations and we'll help you find a contractor guaranteed to do the job right.

Learn more about Authorized Contractors at Unilock.com

### 8 Tips for Choosing A Contractor

### 1 WORKMANSHIP

- > Ask to see projects the contractor completed more than two years ago so you can see how their work holds up over time.
- > Are the pavers laid in a way that minimizes awkward cuts?
- > Are the curves of the project cut in a way that minimizes large gaps?
- > Have edge restraints been used and still in place?
- > How long does the contractor guarantee the work? How many warranty claims has the company had in the past two years?

### 2 SUB-CONTRACTING

Some contractors will hire other companies to perform parts of the work, like lighting and irrigation. Be sure to ask the contractor about these sub-contractors and how they will be managed.

### 3 RELEVANT EXPERIENCE

- > How long has the contractor been installing pavers and walls?
- > Has the contractor installed projects in the past with the features you're considering (eg. a raised patio, retaining wall or water feature)?

### BASE PREPARATION

- > What are the contractor's base preparation methods?
- > What materials are used and why?
- > Is there a standard procedure for base preparation or will the contractor assess your site's unique needs?

### 5 TIMING

- Ask the contractor how far in advance they are booking projects and how long your project might take.
- > What are the contractor's payment terms?
- > Is an upfront deposit required to secure the timing of the project?

### 6 DOCUMENTATION

- > Does the contractor have the proper licensing for their work?
- > Does the contractor have liability insurance and are employees covered by Workers Compensation?
- > Will there be permits required for the job and if so, who is responsible to secure them?

### COMPATIBILITY

- Do you like this contractor? Can you easily communicate and understand each other? Is this someone you can trust?
- > Ask if the person you're meeting will be on site throughout the project or if someone else in the company will be your day-to-day contact person.
- > Contacting references can help you understand how the contractor operates throughout a project.

### 8 DESIGN

- Does the contractor offer a design service? Is there a cost for this?
- > Is the design hand drawn or rendered in 3D?
- > Are the contractor's designs something you would like for your project?

### Protect Your Investment

Learn how to take care of your Unilock products to ensure that they stay beautiful and functional for years to come.

#### **Weeds Can Be Prevented**

When a proper base is installed, there is no soil directly beneath your pavers for weeds to grow. However, if the joints are not kept full with jointing material, it is possible for dirt and weed seeds to blow in from the surrounding area and germinate in the joints.

**In the past** - a basic sand was the only jointing material available. Unless it was replenished regularly, rain would erode the sand, leaving joints vulnerable to weeds.

**Today** - new varieties of sand stabilizing compounds and polymeric jointing material are available which relieves homeowners from this maintenance burden. See page 161 for more information on jointing material choices.

# **Spring Maintenance**

Although most Unilock® products are designed to be low maintenance, there are a number of preventative maintenance steps that can be performed each spring to ensure that your project keeps its pristine appearance throughout patio season.

Check for "creep" - this is where the stones push out (due to winter stress, traffic or failure of the edge restraint), dips, deformations or stains. Should you discover any of these problems, they are all fixable.

Visit Unilock.com or speak to our friendly Unilock staff to find solutions.

# Fall Maintenance

The most important thing to do in the fall is to keep leaves and other debris off your stones. Remove any plant pots, furniture, urns and BBQs that can leach rust onto your surfaces.

### Winter Maintenance

While Unilock products are de-icing salt resistant, using calcium-based products or rock salt (sodium chloride) to melt ice is highly recommended. Use a plastic shovel and plastic blade protectors on snow plows or blowers to protect the surface.

NOTE: Avoid magnesium-based de-icing products as they are very aggressive and may cause damage to the concrete surface.

PROS WHO KNOW, CHOOSE UNILOCK

Many of the same
Unilock products
available to homeowners
in this catalog have been
trusted by professionals
to perform in large scale
commercial projects.

For years, Architects, Engineers, Installation Contractors and Designers across North America have turned to Unilock for leading edge designs and products that are proven to withstand the demands of heavy use.

Did You Know?

Unilock leads the industry with proprietary technologies?

**University of Pittsburgh, Pittsburgh, PA**Designer: LaQuatra Bonci Associates.

Choose the brand the pros choose. There's nothing better than Unilock when it comes to withstanding the test of time.

**Plymouth Rock, Plymouth, MA.** Designer: BETA Group Inc.

**Indianapolis Motor Speedway, Indianapolis, IN.**Designer: Browning Day Mullins Dierdorf.

### Our Quality Commitment

Unilock was the first concrete paver manufacturer in North America to offer a Lifetime Guarantee, and since then we have continued to stand behind it to ensure customers are completely satisfied with our products. With almost 2 billion stones in the ground, that's quite the commitment!

Our products are better and stronger than other brands. In fact, our internal standards of manufacturing in the USA and Canada far exceed industry standards set by ASTM (American Society for Testing and Materials) and CSA (Canadian Standards Association) and other European organizations.

#### LIFETIME GUARANTEE - RESIDENTIAL

Our Transferable Lifetime Guarantee warranties the structural integrity of Unilock concrete paving stones and retaining wall units when used in residential applications. It covers any structural failure or deterioration of the concrete unit resulting from normal use or from the reasonable application of sodium chloride (common rock salt used for deicing). StoneMark™ products have the same warranties as Unilock paving stones and retaining walls, but cannot be warrantied against damage resulting from de-icing products.

Any materials installed and maintained to our guidelines, and subject to normal wear, that prove defective, will be replaced without cost. Proof of purchase is required. Customers are encouraged to submit receipts to us as soon as their project is complete, using the Unilock Warranty Registration Form on our website (Unilock.com).

Purchasers need to ensure that the product they purchase is appropriate for their intended application; for example, only certain thicknesses of products are appropriate for driveways. Color matching of the replacement product and/or lost time cannot be guaranteed and labor costs related to installing replacement product is not included. Unilock reserves the right to seek a professional diagnosis and opinion to determine the exact cause of the product failure. If the failure falls within our warranty parameters, Unilock will replace the defective product.

EXCLUSIONS - Unfortunately, some things are beyond the control of Unilock, and are therefore not covered by this warranty. These include: naturally occurring efflorescence, hazing from polymeric jointing sand, scratching and chipping resulting from snow removal or construction equipment, damage caused by natural or un-natural disasters, or negligence by anyone other than Unilock. The Unilock warranty also does not cover deterioration or damage as a result of poor design or poor installation practices that are contrary to specifications as laid out by ICPI (Interlocking Concrete Pavement Institute) and the NCMA (National Concrete Masonry Association). For more information please visit www.icpi.org and www.ncma.org. Additionally, please refer to the Maintenance, Color and Installation Advisories.

#### MAINTENANCE ADVISORY

#### 1. Cleaning and Sealing

As with anything that is outdoors, Unilock products are subject to harsh weather, dust, acid rain, leaf stains, water stains and general wear from foot or vehicular traffic. Therefore, periodic cleaning using environmentally safe detergents designed for cleaning concrete is recommended to maintain a bright, fresh appearance.

To make subsequent cleaning easier and more effective, a concrete sealer can be applied to new or cleaned products to help prevent the penetration of substances that can cause stains.

There are many types of concrete cleaners and sealers on the market. Always read the instructions carefully before using the product to make sure that it will function as expected. Testing first, in a small unobtrusive area, is always a good idea to ensure the results are acceptable. Consult your local hardscape dealer to find the products best suited for your paver or wall installation.

#### 2. Winter Maintenance

Snow removal by way of metal blades on plows or shovels will scratch and chip the surface of pavers, causing permanent damage. To mitigate this risk, metal snow clearing blades must always have a polyurethane or rubber cutting edge attached when plowing pavers.

De-icing Salts - The use of de-icing products on paver surfaces is important for safety and to help mitigate snow accumulation. Most de-icing products will have some effect on concrete, even if the product label indicates that it is safe on concrete. If you must use a de-icing product, we recommend that you use Sodium Chloride (ordinary rock salt) or Calcium Chloride (for colder climates). Always apply sparingly. The use of

UNILOCK

de-icing products on StoneMark, wet-cast pavers, slabs or coping may damage the product and therefore is not recommended. Whenever possible use a coarse sand as an anti-slip measure instead of de-icing chemicals.

#### **COLOR ADVISORY**

#### 1. Selection

Due to the inherently variable nature of printed materials and digital monitors, Unilock cannot guarantee that products will match the color of printed or online images. Therefore, when making final product selections, decisions should be made based on actual stones which are readily available from Unilock, Authorized Contractors or Authorized Dealers. Most Unilock products are not comprised of a single color, but rather contain blended colors for a more natural appearance. This means that there will be significant color variance from stone to stone, so purchasers should view multiple units together to get a more accurate impression of the overall color.

Note: Unilock Natural Stone variations are outside the control of Unilock. Purchasers of natural stone must be willing to accept this inherent variability.

#### 2. Pre-installation checking

Always check the label to ensure that the Unilock product delivered to your project is the product and color ordered. If there is a discrepancy, or if the product inside the packaging doesn't appear to be correct, contact your hardscape dealer before installing any pavers or wall units. If the product is installed, it indicates your acceptance of the products as delivered.

#### 3. Blending

If the project requires more than one bundle of product it's always a good idea to draw product from several bundles when installing, as this ensures that

any variation between bundles will be seamlessly integrated in the project. When bundles are from different production runs, random selection from multiple bundles is even more important.

#### 4. Efflorescence

Efflorescence is a naturally occurring process that may appear as a white or light grey powder on the surface of concrete, clay or natural stone. It is temporary, and will disappear over time. However, if it is bothersome, an efflorescence cleaner can be used to remove it. There is no way to predict or prevent efflorescence. Because it does not compromise the structural integrity of the product, it is not covered by Unilock product warranties.

#### **INSTALLATION ADVISORY**

#### 1. Construction Residue

While a certain amount of dirt on pavers and walls is inevitable during the construction phase, installers are strongly encouraged to clean as they go as construction residue can embed in the surface and become difficult to remove. The slurry produced during wet-saw cutting is particularly stubborn to clean if allowed to dry on the surface of pavers. Unilock warranties do not cover stains caused by a failure to remove construction residue.

#### 2. Polymeric Haze

Surface hazing caused by polymeric jointing sand is not the responsibility of Unilock. Polymeric jointing sand should only be installed by an experienced and knowledgeable contractor. Any sand that is left on the surface prior to activation will result in a haze that is very difficult and time-consuming to remove. Only the highest quality, brand name polymeric sand that is guaranteed by the manufacturer should be used.

#### 3. Compaction Damage

Both smooth and textured paver surfaces can be scratched by compaction equipment used to 'flatten' a new paver installation. Therefore, metal plate compactors must be fitted with a polyethylene mat to protect the paver surface from becoming scratched, or a superior option is to use a rubber-roller compactor instead. Damage to product surfaces caused by failure to follow these instructions is not covered by Unilock product warranties.

Visit Unilock.com to register for your Transferable Lifetime Guarantee.
